Professor Lily Rui Liang is currently an associate professor at the Department of Computer Science and Information Technology, University of the District of Columbia, Washington D.C., U.S.A. She joined UDC in 2004, after receiving her Ph.D. degree of Computer Science and Engineering from the University of Nevada, Reno, Nevada, U.S.A. Teaching and conducting research are passions of Prof. Liang. Her research areas include bioinformatics, data mining, artificial intelligence, fuzzy logic, digital image processing and information assurance. She is currently working on several funded research projects. The results of her research are published at various international conferences and journals. While doing research, Prof. Liang mentored many graduate and undergraduate students and assisted them to launch their careers. Professor Liang has also been actively engaged in several important institutional efforts of UDC, such as general education reform, student learning outcome assessment and STEM faculty professional development.
